Abstract

Education by Tribulations - Educational Study of Verses of Infestations in the Holy Koran

According to his wisdom Allah the Almighty tests creatures in good times and bad, good times is not a sign of love and acceptance, although other times (bad) is not a sign of hatred. In both cases of Infestations Allah wants worshiper to be rational and good worshiper, good and evil are created for a reason which is "people struggle", some follow the right bath but the others don't.

2009

Today most of our Islamic nation suffer much Infestations and adversities, Allah the Almighty promised Nation of Islam not to perish by the hands of enemy or disease, he also promised to Sublime Nation of Islam with charitable and leadership - that is firmly adhered to Islam - this research believes that the illness of the nation today is a matter of Education by tribulations, with a view of refining and returning Muslims to senses and re-mind of Allah traditions of leadership and empowerment.

The research studies states of Infestations in the holy Koran educationally using the analytical method of philosophical research, taking advantage of these verses in building an integrated visualization of "education of tribulations curriculum," and illustrates the outcome of that afflictions are permanent to clean and empower believers and to remind and punish unbelievers. The importance of research comes here to focus on important but abandoned aspect of Islamic education in spite of its importance and severity of need.
